# Roadmaps related questions

## “High Level” questions

- What are SAPs roadmap priorities?
- What is planned in a specific industry?
- How about new features within a business process or current trend topics?

## Detailed questions

- Which functionalities are planned by SAP for a specific SAP solution?
- What does the functionality contain?
- When will it be delivered?

# The SAP Road Map Explorer

- Latest road map content, by product, process and industry
- From SAPs high level priorities to detailed Road Map Items
- Direct access to capability and feature information and to their value proposition
- Harmonized view with a „slice & dice“ and personalization functionality
- Continuously updated content and easy navigation.

## Value Proposition

### Empower Users

An interactive tool allowing users to build their own road map

### Provide Consistent and Reliable Information

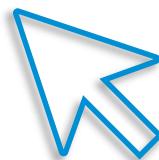

Dynamic road maps that are updated throughout the year, providing additional details as innovations are delivered

### Create a Seamless Experience

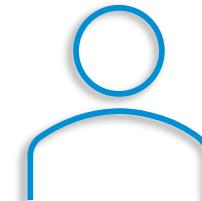

Intuitive design to create an easy access to desired road map and innovations

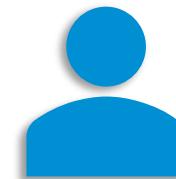

**Date:**  
March 31, 2022

## Retail

Pivot to the future and transform shopping experiences on every channel with cloud retail solutions from SAP

Retailers can leverage technologies, such as cloud, AI, robotics, IoT, and VR/AR, to provide the experiences that delight customers.

[View full Road Map](#)

## Road Map Priorities

Deploy a new digital core to better absorb technology innovations, support new business priorities with capabilities in SAP

SAP Order Management is the intelligent industry core to connect digital with brick and mortar and support omnichannel execution. Customers rely on the steady operations of all essential back-end processes while producing new business outcomes to meet shoppers' needs immediately. Its single source of truth provides the necessary real-time data insights to stay on top of their business every second of the day.

Ability to create sales orders on multiple sales channels (e.g. SAP Sales Cloud, SAP Commerce Cloud, SAP ERP, SAP BusinessObjects)

Customer basic of host

Integration of fashion and apparel, food and beverage, and SAP ERP Business Objects

[Show on Road Map](#)

Orchestrate consumer orders with SAP Order Management foundation

Ensuring critical omnichannel order management must have access to all realms. This includes collecting orders captured in one or several customer channels with physical and/or digital storefronts, processing products including picking and sourcing information and orchestrate to the corresponding fulfillment system(s).

Additional sales channel integration (e.g. SAP Sales Cloud, SAP Commerce Cloud, SAP ERP, SAP BusinessObjects)

Advanced orchestration and sorting (e.g. SAP Order Management foundation)

Role support for more industries and business units (e.g. SAP Order Management foundation)

One customer experience (e.g. SAP Order Management foundation)

[Show on Road Map](#)

Support your consumers' return journey with SAP Intelligent Returns Management

SAP Intelligent Returns Management is a return optimization solution that provides a return routing and dispositioning engine that guides a returned product from the customer's hands to the final dispositioning step, algorithmically maximizing both margin and customer experience.

Customer routing with return options, dispositioning engine

# Introducing the Business View and the Road Map Priorities

## Road Map Priorities

### Road Map Priorities

- Title
- Short description/ value proposition
- Assigned innovations

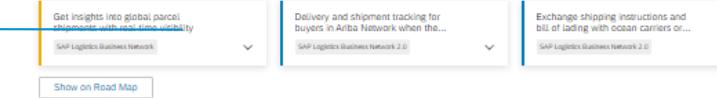

3 – 5 priorities per Cluster

### Road Map Priorities

#### BUSINESS NETWORK I Collaborative Supply Chain

True cross-network collaboration scenarios to achieve supply chain visibility and collaborate with shippers and carriers, share insights, and gain enterprise-wide transparency with unified experience for all trading partners

#### BUSINESS NETWORK I SAP Business Network 2111 Release

SAP Business Network 2111 has been released to support SAP's network strategy to unify our existing networks to allow you to collaborate in real time with all trading partners in your supply chain so you can conduct business faster and more efficiently than ever before.

### Road Map Priorities

#### SAP Analytics Cloud further simplifies data analysis and reporting

SAP makes the data analyzer feature readily accessible in the Q4 2021 release of the SAP Analytics Cloud solution, simplifying exploration and insight discovery. Analysts can access data directly in SAP HANA and SAP BW without having to predefine a data model in SAP Analytics Cloud. In Q1 2022, SAP Analytics Cloud plans to support scheduled report personalization on 'bursting'. This capability uses model access restrictions, live data authorizations, and language and profile information to personalize and deliver information for report recipients. Together with the recent release of paginated reports and formatted pages, this update gives customers a comprehensive enterprise reporting solution in the cloud.

#### SAP BW bridge facilitates more successful, streamlined public cloud migrations

The new SAP Data Warehouse Cloud, SAP Business Warehouse bridge lets organizations move data from the SAP BW application to the SAP Data Warehouse Cloud solution. This can help customers innovate and extend their data reach in the public cloud while leveraging existing environments. In early 2022, SAP plans to add new capabilities to simplify SAP BW-based integration and staging moves by employing a tool-based approach.

Access to the entire road map for Cluster

### Road Map Details & Timelines

The release plan for Network and Spend Management outlines our commitment to continuously deliver new capabilities and provides early visibility for upcoming release waves.

## Industry View

### Road Map Priorities

- Big topics, main themes, new “solutions”
- Related to strategic priorities and industry trends
- Connected to planned product deliveries

### Industry Cloud Solutions

- All relevant Industry Cloud Solutions (ICS)
- Detail road map view per ICS with one click

### Data Collection

- The RME collects data from the **Industry Cloud Solution Repository (ICSR)** via API and displays the appropriate ICS.

#### Consumer Products

Embrace intelligent technologies and next-gen business processes to deliver personalization with a purpose.

SAP solutions enable consumer products companies to be responsive and provide personal, secure, and simple shopping experiences.

[View full Road Map](#)

#### Road Map Priorities

##### Last Mile Distribution for Direct Distribution

Last Mile Distribution (LMD) enables manufacturers and suppliers of different consumer goods industries to coordinate the distribution process and all its subprocesses centrally. This process supports manufacturers and suppliers of different consumer goods industries as an alternative approach to central retail delivery for providing goods to stores. LMD is most suitable for supporting the needs of consumer goods companies involved with beverage and food production, as well as tobacco distribution and oil and gas companies.

##### SAP Digital Manufacturing Cloud for Execution for process manufacturing

Accelerate the operational responsiveness and improve operational visibility with the SAP Digital Manufacturing Cloud solution, a manufacturing execution system (MES) of real-time data and analytics. Execute manufacturing processes, analyze manufacturing and business data, and integrate systems with a cost-effective, high-quality, and resource-efficient method based on Industry 4.0.

##### SAP Logistics Business Network, material traceability option

SAP Logistics Business Network, material traceability option is an application augmented by blockchain technology. It meets the needs of the entire consumer journey and accelerates operational responsiveness by improving transparency, visibility, and efficiency by connecting the entire supply chain end-to-end.

#### Road Map Details & Timelines

The release plan for Consumer Products outlines our commitment to continuously deliver new capabilities and provides early visibility for upcoming release waves.

#### Industry Cloud Solutions for Consumer Products

Your business is unique. Together with our partners, we can help you drive cost-effective transformation and sustainable growth through specialized applications that address specific industry needs. Built by SAP and our partners on an open platform as a service using SAP Business Technology Platform, these solutions work with your existing systems to extend the value of your investments.

# ICS Tiles: What gets displayed?

## Examples

## Industry Cloud Solutions for Automotive

Your business is unique. Together with our partners, we can help you drive cost-effective transformation and sustainable growth through specialized applications that address specific industry needs. Built by SAP and our partners on an open platform as a service using SAP Business Technology Platform, these solutions work with your existing systems to extend the value of your investments.

The image shows three cards representing Industry Cloud Solutions:

- Vehicle Data Platform** (Partner Solution, Planned for Q1 2022): By Otonomo. Otonomo is a content provider for harmonized vehicle telemetry data. It powers next-generation truck and car fleet management capabilities based on connected car data. The connected car space is evolving from aftermarket telematics devices to embedded devices that are fitted to the car in the factory, delivering further insight, improved operations, asset management and safety. (Business Technology Platform, +1)
- SAP Broker Reconciliation for Commodity Derivatives** (SAP Solution): By SAP. Increase efficiency by automating broker statement reconciliations with booked commodity derivatives and work by exceptions within a modern and intuitive app. (ERP and Finance, +12, View Road Map Items)
- SAP Complaint Handling** (SAP Solution): By SAP. SAP Complaint Handling is a software-as-a-service solution that helps breaking the silos between Quality, Warranty and Logistics teams by providing a holistic view on the issue status and the follow-up activities of complaints to unlock additional supplier recovery potential with a low implementation footprint. (CRM and Customer Experience, +5, View Road Map Items)

# Kanban Board: Overview

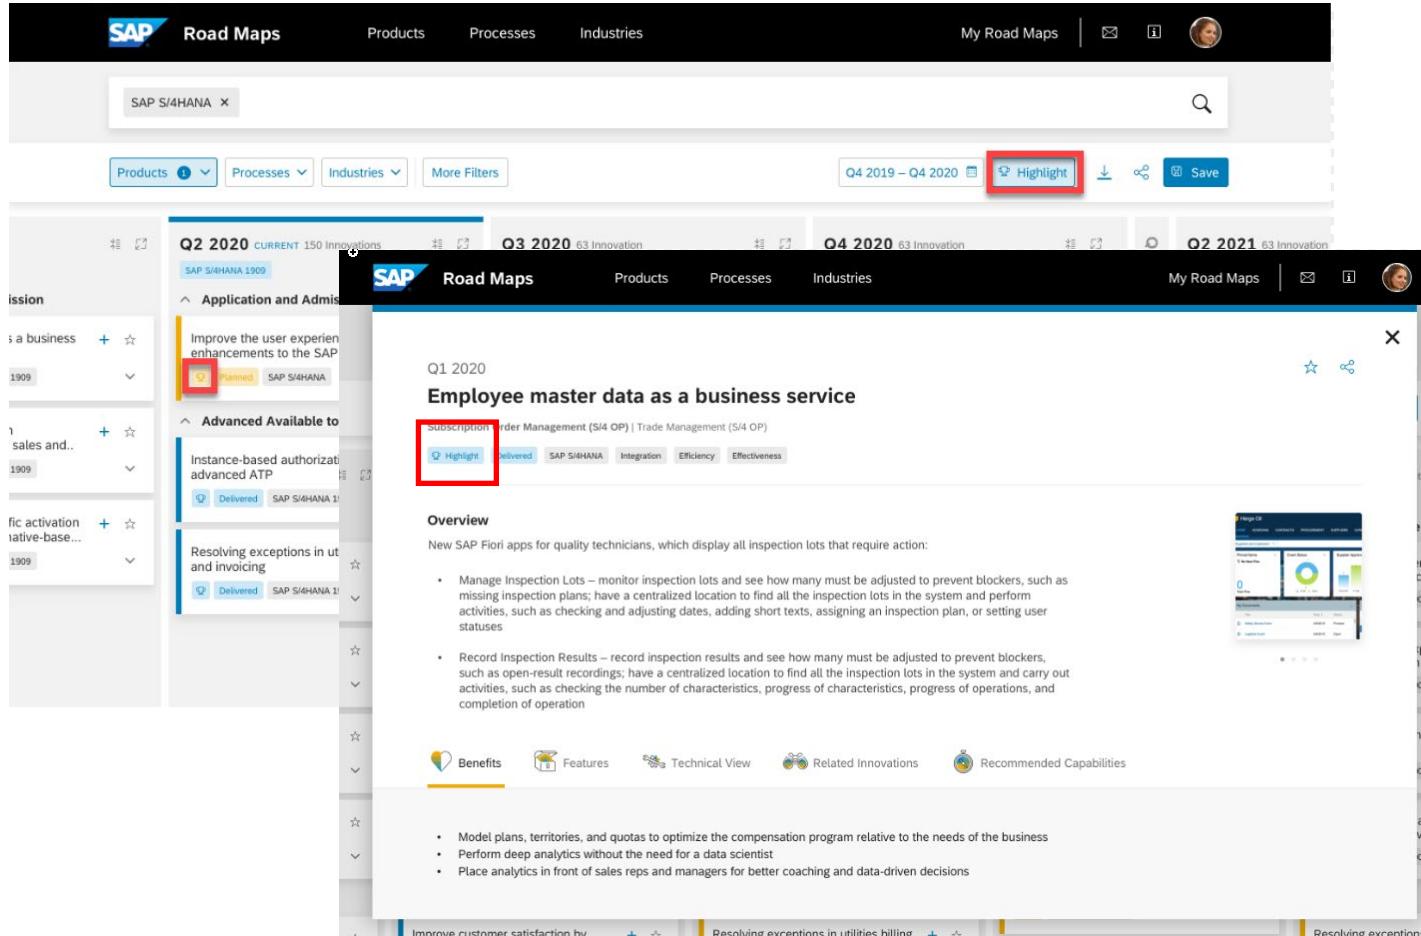

## Kanban Board:

- The Kanban Board will showcase product features or “innovations” by quarter and year, according to your own filters.
- Innovations are organized by business capabilities. Business capabilities are listed *alphabetically*.

## Collapse/Expand:

- **Collapse/Expand:** Change your innovation view by clicking on the arrows

# Highlights Feature

The screenshot shows the SAP Road Maps Explorer interface. At the top, there are navigation tabs for 'Products', 'Processes', and 'Industries'. On the right, there are links for 'My Road Maps', a search bar, and a user profile icon. Below the tabs, a search bar contains the text 'SAP S/4HANA'. Underneath the search bar are filter buttons for 'Products', 'Processes', 'Industries', and 'More Filters'. A date range selector shows 'Q4 2019 – Q4 2020' with a 'Highlight' button highlighted by a red box. To the right of the date range are download, share, and save icons. The main content area displays a grid of innovation cards for different quarters. The first card for Q2 2020 is expanded, showing a detailed description of 'Employee master data as a business service'. This card also has a 'Highlight' button highlighted by a red box. The card includes sections for 'Subscription', 'Overview', and 'Benefits'. The 'Benefits' section lists: 'Model plans, territories, and quotas to optimize the compensation program relative to the needs of the business', 'Perform deep analytics without the need for a data scientist', and 'Place analytics in front of sales reps and managers for better coaching and data-driven decisions'. The background shows other innovation cards for Q3 2020, Q4 2020, and Q2 2021.

## Innovation Highlights:

Innovation Highlights are prominently displayed on the SAP Road Map Explorer. These innovations show the best of the coming release.

# Innovation Highlights

The screenshot shows the SAP Road Maps interface for SAP S/4HANA. The top navigation bar includes 'Road Maps', 'Products', 'Processes', 'Industries', 'My Road Maps', and a user profile. A search bar and a 'Highlight' button are also present. The main content area displays a grid of innovation highlights across four quarters: Q2 2020, Q3 2020, Q4 2020, and Q1 2021. Each quarter section has a title, a count of innovations, and a 'Future Releases' label. The Q2 2020 section is expanded, showing categories like 'Application and Admission' and 'Advanced Available to Promise'. A specific innovation in the 'Advanced Available to Promise' section is highlighted with a yellow box and a lightbulb icon. The Q4 2020 section is also expanded, showing categories like 'Account Payable' and 'Application and Admission'. A yellow box highlights the 'Highlight' button in the top right corner of the Q4 2020 section. The Q1 2021 section is collapsed. The left sidebar shows a navigation tree with categories like 'Business', 'Sales and...', 'Fiori activation', and 'Native-base...'. A sidebar on the right lists 'Innovation' and 'Future Releases'.

## View all Highlights:

- To view all highlights, click on the “Highlight” button beside the Save button.

## Innovation Highlights:

- Innovations that are “Highlights” will have a lightbulb icon on box.

## Lead- and account-based marketing: Discover demand units

### Account-Based Marketing

SAP S/4HANA Cloud 1905 SAP S/4HANA Cloud Efficiency

#### Overview

SAP Marketing Cloud solution support for discovering demand units early in the demand funnel and at scale:

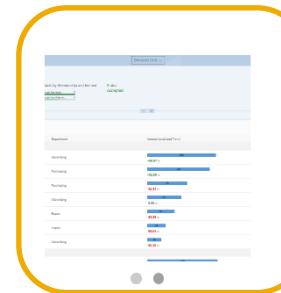

- Integrate the demand-unit proposal on the marketing overview page
- Readily assign contacts of a demand unit to draft or active trigger-based "always-on" campaigns

Benefits

Features

Technical View

- Receive intelligent proposals of the most-promising demand units
- Focus on important demographic and intent facts
- Identify the group of currently relevant contacts per account who show interest in a solution or product
- Target and engage with the right people especially in the more-advanced stages of the demand funnel

#### View photos:

- Click on the images to view the full size images.\*

#### Favorite the innovation:

- The star button will favorite the innovation, allowing you to easily view it on your Kanban board.

#### Share the innovation:

- Share this one innovation to your colleague!

\*Images: Not all innovations have photos available.

# Search Bar – How category filter works

## Selection of multiple items of 1 category (e.g. products) > Follows the "OR" function

- Search: "S/4HANA", "C/4HANA"
- Result: Innovations that belongs to S/4HANA **OR** C/4HANA

## Selection of items of 2 or more categories (e.g. Product, Industry) > Follows the "AND" function

- Search: "S/4HANA", "Airlines"
- Result: Innovations that belongs to S/4HANA **AND** Airlines

## Selection of multiple items of 2 or more categories (e.g. Product, Industry) > Follows the "OR" and "AND" function

- Search: "S/4HANA", "C/4HANA", "Airlines", "Banking"
- Result: Innovations that belongs to **(S/4HANA OR C/4HANA) AND (Airlines OR Banking)**

# Search Bar – How search & suggestions work

## Free text search (type and hit "return/search")

- Hint: Only 1 free-text query possible, if adding a new one → replacement of first one
- Search: “*circular economy*”
- Result: Innovations which include “*circular economy*” in *innovation title or description* will be found

## Type to get filter suggestions out of all existing categories (type at least 3 letters and don't hit "return/search")

- Fuzzy factor
  - Best result = 1, minimum result = 0,6
  - Ranking in descending order from 1 to 0.6
  - If there is a typo, factor will be reduced to 0,9
  - If a circular is found, and a fuzzy factor of 0,7 > search will hit the 2 categories ranked higher
- Search containing “Platform” will result in all “Platforms” but will rank in order of the best fuzzy result AND some kind of a hit counter for the respective categories

## Selection and free text search > Follows the “AND” function

- Search: “S/4HANA”, “*circular economy*”
- Result: Innovations mapped to S/4HANA **AND** including “*circular economy*” in *title or description* are found
